Subject: Testimony to be Given at Today's Hearing

1. Attached is the subject testimony for today's first CI hearing before the SSCI. The only omission is the testimony of LTG Odom, which I have not yet received.

2. Some of the questions/question areas which are likely to come up include:

- several questions which basically ask the DCI's/other witnesses views on the "need for a National Strategy" in both the CI and CM arenas
- several questions which get at the need for "better coordination of effort" among the different agencies involved in both CI and CM
- Do you support the Leahy/Cohen Amendment; why isn't State moving more aggressively to implement it?
- What can we do to combat the use of Eastern Bloc personnel as surrogates of the KGB?
- Does the Office of Foreign Missions have plans to restrict travel within the U.S. of Eastern Bloc officials?

Page 2

- What is the extent of the problem vis a vis use of "commercial fronts" for espionage activities within the United States?
 - What safeguards (i.e., quality control, training, etc.) are being employed given expanded use of the polygraph? What is being done to prevent overreliance on the polygraph as a personnel security tool?
 - Is there a need for a central personnel security office to assure interagency coordination, policy consistency, and quality control in this area?
- 

The questions I've seen are all very general and should be handled without difficulty by the witnesses at the table.
